MINING, BUSINESS AND STOCKS.

THE WEEK ON THE EXCHANCE.

Ajax, Ben Butler and Century Furnish the Features.

Exactly 40,000 Shares Changed Hands -Ben Butler Unchanged-West Morning Glory Firm.

Business was very good on the mining exchange during the past week. Over 416,000 shares of stock changed hands for the sum of \$276,666.63. The sales today amounted to \$75,561 representing the sale of 52,900 shares. The present week closes on a very interesting stock market, caused by a remarkable stiffening up in the prices of several stocks notwithstanding the

excessive heat, which usually demoralizes the stock business. Ben Butler, Ajax and Century furnished the most important features of the week on the exchange. Ajax, which opened at \$1.49 on Monday, sold up to \$1.83% today on news of a decided improvement on the 1.000 level. Exactly 40,000 shares changed hands today at prices varying between \$1.68 and \$1.83\(\frac{1}{2}\). Ben Butler has changed hands at better than 21 this week owing to encouraging reports of the mine. In the beginning of the week it was traded in at 12\(\frac{1}{2}\) per share. Century was offered at \$2.69 on Monday, but it has since strengthened to \$3.00. West Morning Glory has also been a favorite this week, though no special change is reported at the property. Early in the week it sold at 5 cents, but it has since sold up to \$1\(\frac{1}{2}\). A lot of 3.000 shares was dropped today at 7\(\frac{1}{2}\). Yankee Con also put on a spurt and sold up to \$5.12, as compared with \$4.90 1,000 level. Exactly 40,000 shares changed sold up to \$5.12, as compared with \$4.90 earlier in the week. Daly-West has been active under \$43.00, while Star Con. has been stronger around 50. Eagle and Blue Bell is a little weaker, at \$1.10 per share, while Uncle Sam has moved up to \$1.80, after opening around \$1.65 in the beginning of the week Northern Light sold up to 5% today Dexter continues very weak, while Lower Mammoth has sold as low as \$3.65. South Swansea is unchanged. Ontario weakened to \$9.60. Daly is not so strong, while Silver King hangs somewhere between \$79 and \$83 per

GOOD STRIKE IN THE AJAX.

n ager Weir Reports 3 Feet of Shipping Ore.

FORMER WAS ACTIVE TODAY QUINCY IS ON THE IMPROVE

Director Newell Has Returned From the Camp-Planet Company Will Run a Tunnel-Notes.

The best news liberated by Manager Thomas Weir of the Ajax, for a long time, was given out today on Mr. Weir's return from the mine. The north drift on the 1,000 level, which is now about 400 feet away from the Mammonth, is showing up splendidly. A body of shipping ore has been broken into which is fully three feet wide. An average assay of the whole face, taken after the shots were fired yeesterday morning, showed a little over 8 per cent copper with about 10 ounces silver and \$2 in gold per ton. The condition of the drift today is not known as Mr. Weir did not expect to talk with the mine until tonight. The present assays are, however, much higher in copper than those previously secured and the belief is entertained that the drift is just entering an ore chute of no mean dimensions. The developments of the next few days will be anxiously await-

QUINCY LOOKING WELL. Henry Newell Says the Developments

on the 400 Are Very Satisfactory. Director Henry Newell of the Quincy Mining company, who came down from Park City last evening, reports the mine sending out 100 tens of ore per day as usual. Mr. Newell says the mine is in first class condition. The developments on the 400 level are very encouraging, as are the stopes in other parts of the mine. The ore being extracted is all first class, no sec ond being encountered thus far in the mine. Mr. Newell says the ore carries on an average, 65 ounces silver and about 45 per cent lead per ton. A dividend is said to be in sight for the end of the month.

ITEMS FROM BINGHAM. Good Samples from Highland Boy

Con.-Shawmut Mill Doing Well. In its weekly review of the Bingham camp the Bulletin says:

An additional set of rolls is soon to be put in at the Dewey mill.

R. S. Guliani is shipping a car of fine lead ore from his Venice group.

A carload of poles to be used in con-

structing the Telluride Power com-pany's line from Logan arrived Mon-They will be planted between lo cal sub-station and top of east divide at Upper Bingham. The Francis lode, a bit of ground ad? joining Sampson group appearing or The Bulletin's map as vacant, has just

been located and recorded by the Samp. son mining company The two boilers for the New England company (Nast mine) arrived last Monday, Superintendent Ike Hazelgrova wil have to take a day off and denude them of whiskers, grown since they

W. R. Smith, superintendent of the Parnell (Highland Boy Con, group of mines), Tuesday carried some goodlooking samples of black oxide of copto the city for assay, also pieces of ore between which the oxide oc curs that will no doubt show 4 or 5 per cent copper. The samples came from the Andy tunnel, which has now been driven 600 feet and is expected to encounter a large ore chute in about 100 feet. The tunnel, lately turned to crosscut the veln, has run 20 feet in the same kind of mineral as the samples.

and the breast is still in it

Superintendent Under charge of Superintendent Thompson and with the machinery looked after by C. A. Smith the Shawmut mill was limbered up Tuesday af-ternoon and Wednesday made its first regular run of the season, taking power from the Teluride Power company line. Very fine-looking concentrates were made, from U & I ore, which will be delivered daily to mill bin by team from the upper level. The power serfrom the upper level. The power service was most satisfactory, all parts of the mill behaved well, and apparently a start is being made that will be followed by a profitable season's run. Another shipment consisting of three cars of excellent ore, was sent out from the Rogers & Wilbur Commercial lease early in the week. The fourth car goes out today, and others will regularly fol-low. As stated by The Bulletin two weeks ago, the boys are working from surface with privilege of 50 feet depth on one of the Commercial's fissures, which has thus far given up to them nearly 500 tons of shipping ore, while there are upwards of 200 tons of sec ond-class on dump and they are taking out as little as possible of anythin-

that wil not pay handle in crude state. A second 100-ton bin, built at the m this week, was completed Wednesday,

South Swansea Shipments. Claude Wheeler, who returned from the South Swansea of Tintic a day or two ago, reports the usual force emcipally. Some ore is being taken out but the company is still awaiting the arrival of the new pump which was shipped on the 12th tast. On its ar rival the company will resume sinking The intention is to explore the lower levels and ship only such ore as may he necessary to pay expenses. According to Mr. Wheeler's statement shipments from the South Swansea will not be heavy for several months. The company had four more cars of ore on

the market today. Planet Company's Plans.

In addition to drifting on the vein on the 150 level and crosscutting the vein on the 170-foot level, the directors of the Planet Mining company of Park Valley have decided to run a tunnel a dis-tance of 150 feet to intercept the Rover yein which is said to pass through the property. In running this distance J H. Clive says a depth of about 450 feet on this vein will be obtained. The vein has been stripped on the surface and The management is also considering the proposition to extend a 750-foot tunon the main vein on the property as to make connections with the haft at a depth of about 275 feet.

Oil Locations Near Promontory. Ex-Mayor Robert Lundy, who returned recently from Colorado, where

nterests, will leave in a day or two for the vicinity of the oil fields located on the lake shore west of Promontory. Several other Ogden parties, including Hunter & Kennedy and Ed Black are interested there, but far the largest portion of the holdings are in the pos-session of Chicago parties, who are at present forming a company to develop

The locations which now cover this field have been made during the past three weeks. The Chicago people employed Ogden parties to make locations and then after several analyses been made they sent a representative here to get options on as many hold-ings as posible and make other loca-tions, and, it is rumored, that their recent analysis has revealed the pres-ence of some valuable substances and they will soon have machinery on the ground to work the field.—Ogden Stand-

The directors of the May Day Mining ompany were scheduled to meet this morning. Owing to the absence of Directors Larson and Darmer no meeting was held. It was stated that if Mr. Larson did not put in an appearance this afternoon an adjournment would be taken until August 1, at which time a dividend would be declared, payable on August 10. Manager Hunt says the ompany is in a condition to pay one any time

A dispatch from Phoenix, Artz. states that a mining case of exceedingly large proportions was begun there yesterday when George Mitchell, superintendent of the La Cananea mir northern Sonora, began suit against Wil liam Melczer of this city for \$500,000. Melczer is the main owner of the La mine, also in northern Mexico Mitchell claims that he had an agree ment with Melczer, whereby he was to receive 10 per cent of the stock of the ty, which he says he has not received.

WOOL.

About a half a million pounds of wool was sold in southern Utah during the early part of this week. This, say the local dealers, about clears up the entire Utah clip. It came principally from Garfield and Wayne counties and brought from 9 to 91/2 cents a pound. These are low figures compared with what the wool of the northern counties of the state has brought. The reason is accounted for in the fact that south ern Utah wool is never as good as the northern product.

FLOUR AND GRAIN.

The market demand for wheat is very firm at prevailing prices, which have moved up from 1 to 11/2 cents a bushel during the week. The figures quoted today are 57 to 57½ cents for the best article, carload lots. New wheat has scarcely got on to the market yet. Its nearest nominal value is quoted at 50 cents per bushel.

Flour has fallen a little since the last neeting of the Salt Lake Millers' association one week ago. The prices then were \$1.80 for high patent, \$1.60 for straight grade and \$1.50 for baker's No. Today it can be bought for \$1.70, Utah is still dependent upon eastern

importations for oats and corn. prices are the same as have obtained for weeks past. The demand is quite

LATEST REPORTS FROM BEET FIELDS

An Unprecedented Tonnage is Looked For.

CROP READY FOR SAMPLING

The Estimates in the Banner Districts Are That the Y teld Will be Fourteen Tons to the Acre.

Special Correspondence.

Lehi, July 19 .- The various statements of the agents of the Utah Sugar company throughout the beet growing districts have just been received at the factory and form interesting reading. The figures of the acreage in each district are given below and in view of the scarcity of water in some places, they present a most gratifying showing. They are as follows:

Salt Lake county Lehi American Fork	1,150
American Fork	1,100
American Fork	
	. I au
Provo Valley (Wasatch county)	100
Lake View	1294
Pleasant Grove	204
Vineyard	120
Provo	594
Springville	. 896
Mapleton	332
Spanish Fork	
Benjamin	
Payson	
Sanpete and Sevier counties	

These figures represent the crop tually growing, thinned, and alm ready for sampling. Each agent's port contains an estimate of the nu ber of tons to the acre in his distr and in every instance the figure much larger than last year. In the banner beet district of Provo and Springville, the estimates run as high as 14 tons to the acre. The agents are instructed to be most conservative in their estimates and their figures are regarded as being rather low than high. It can be seen that if the average tonnage is only 10 or 12 to the acre, the total will be the greatest in the history of the Utah Sugar company. A record of the pounds of sugar pro duced by the company in the ten years it has been in existence has also been

compiled as follows:

IN UTAH COUNTY.

Assistant field Superintendent Heber Austin has just returned from a thorough inspection of the beet crop of Utah county and crop reports that the crop generally speaking is in a very encouraging condi-tion, although in a few instances the water is falling short, especially in those districts depending on the Spanish Fork river, as the river is even lower now than it was last season at this date; yet notwithstanding even in these cases, the beets are in a very healthful condition, free from all disease and insects. This state of the crop, togethe with the excellent way it is being ooked after by the farmers will go long way to offset the drouth. Then supply of water up until recently has been fairly good and a large per-centage of the beets have matured far to make nough with what water the farmers have at their disposal.

THE BANNER DISTRICTS.

Referring to Springville and Provo ocalities, which are the Utah Sugar o.'s two largest districts (Lehi excoted) having in the neighborhood of two thousand acres. Mr. Austin says the tonnage will even exceed the yield of any past season, as they have plenty of water to mature the crop. Lehi has always been as short of water as any other district in the county; at this time of the year, however, while the water a little short here, all other conditions have been very propitious thus far, and from present indications the beet yield will be good.

IN SALT LAKE COUNTY. Supt. James H. Gardner has just returned from Salt Lake counwhile there inspected also conversed with a number of farmers on the outlook for beets. It is his opinion that the beet crop generally speaking in that county, will be above while the water supply equate, those parties is quite water at their com-crop; the beet crop is ing all suffering to the extent inferred by people not therefore that mig the situation

Austin has also just reovo Valley, where he visth of beets in that valited ever promising for the first season no for better prospects, this valley are becomsted in the beet indus a good showing in this their first sca-

the Utah Sugar Co. from Sanpete and Sevier counties say that while the grasshoppers were playing havoc with crops and lucern in those districts. hey did not seem to interfere much with the beets, and as the conditions generally speaking have been most favorable to the beet crop in most favorable these southern counties this season is expected that the tonnage will far exceed the yield of last year.

BUSINESS AND REALTY.

The feature of the week in local stocks has been the fluctuation in the price of Sugar. The press reports of a probable war between the Western Trust (Spreckles) and the coast beet sugar interests (Oxnard) made some local holders of Sugar nervous, and they threw their stock upon the market in considerable quantities, with the consequence that the price broke several points; sales were made at \$16.75, \$16.50 and \$16.25. It was noticeable that the sellers belonged to the new element of investors in Sugar stocks, and that the old timers, those who have been with the Sugar company from the beginning were not only doing no selling, but that they bought in rapidly whatever was offered below last week's prevail-ing price of \$17. The main buyers The main buyers during the week have been W. S. Mc-Cornick, who purchased 1,000 shares; he has been attending to his mining to his m

Smith, H. G. Whitney and the State Bank of Utah, the last named institu-tion having also bought 1,000 shares. As these parties are all closely connected with the Sugar company, most of them being officers, it is evident that the prevailing nervousness among the new-er investors is not shared by the "in-

One of the officers of the Utah Sugar one of the officers of the Utah Sugar company said to a "News" representative this morning that the troubles on the coast were simply the annual recurrence of what has been going on for ten years when the California beet sugar carse into the warket and came sugar came into the market and came in contact with the cane sugar. "It cuts but little figure with the Utah factories," said this gentleman. "None of them have a pound of sugar on hand, and wont have for two months. The coast troubles are usually adjusted long before that, and if they are not, there is a freight rate of three-quarters of a cent a pound between the coast and here, and that alone gives / very substantial protection."
Mr. Joseph Geoghegan, the sugar

broker, says there is no change in the price of the product. Salt Lake quotations are, for beet sugar, \$5,65 per 100 pounds; San Francisco, \$4.90. Mr. Geoghegan says the latter rate is only 40 cents more than the cost of raw sugar, and if refined were reduced below that point, the Trust would be doing business at a loss. Mr. Geoghegan rightly says that the Utah factories will have nothing to complain of, if even the present prices maintain, to say nothing of the chances of an advance before their product is ready for Ogden Sugar stock fell to \$180 from

the same influences that effected Lehi, but as the capital of the former is much more closely held than that of the latter, transactions were fewer.

The week in building has been active, though not as active as it would have been had it been possible to have secured a sufficiency of brick. It is reported that there are now 169 buildings in the course of erection, and of these. I have just got the foundations in and are held back for want of brick. The shortage was caused, in a large measure by the big rain which flooded Salt Lake in the middle of last May, millions of brick being destroyed. Prices of brick have advanced \$2 and \$4 higher than they were at the beginning of the year, and now range in price from \$8 to \$22 per thousand.

For a consideration of \$1.500 Misses Annie and Mary Felt have completed the puichase of a lot, 2½ by 20 rods, near the corner of First West and First North streets. It is their intention to elect an eight-room modern house. The puchase was made from Mrs. Alice Lit-

. . .

Plans have been prepared by Arch

ect J. A. Headlund for a \$2,500 brick north Second West street or J. A. Hagman. He will also make alterations and additions on Angus anach's house on Cannon farm, to the extent of \$1,000.

LOCAL BANK CLEARINGS.

Salt Lake City continues to bear aloft he banner of increased business per-entage as shown by the bank clearings of the country. In the matter of in-crease it leads every city in the land. The figures for the week ending Thurs-day as shown by Bradstreet's official ompilation are \$64,850,638 or an increase of 95.3 over the corresponding week of ast year. New York, the great finanal center of the world, comes next ith an increase of 93.3 as compared ith the same week of last year. Our ncrease over that of Denver is someercentage increase. In the actual volme of business transacted we are sevral hundred thousand dollars ahead of he Colorado metropolis whose business ast year for the same week. We lead Los Angeles by more than a million and three-quarters of dollars and, all f the other cities popularly believed to e in the same class as our own Today's bank clearings were \$487,849. 17, compared to \$246,889.48 for the correspanding day last year. The week's clearings amounted to \$4,313,587.67, while the same week last year \$2,240,347.50 was recorded.

Bank Clearings.

The bank clearings throughout the United States and Canada for the week nding Friday, July 19, 1901, were as

BEARS OFFERED STOCKS.

Bulls Tried to Bid Them Up, but Their Efforts Ptoved Unavailing.

Profit Taking Caused Fitful Rallies-The Closing Was Active and Rather Weak.

New York, July 20.-Some depression was manifest in the opening stock market but it was offset by gains in a number of stocks, Atchison fell 14 and United States Steel declined 14, but rallied 1/2. Buying orders for 3,000 shares of Southern Pacific lifted that stock to 56%, an extreme rise of %. Trading became almost lifeless until the professionals began to work up the principal stocks to discount the expected good bank statement, St. Paul, Missouri Pacific, Southern Pacific and Texas Pa-

by Atchison, and Union Pacific moved up 14 from the lowest. Heavy realizing sales came in the market at 10:30 The bears promptly offered stocks free ly and drove St. Paul down 24. Union Pacific 23. Eric second preferred 24. Atchison 14. Southern Pacific 14. and Reading, Eric, the Southwesterns, Sugar and Amalgamated Copper 16

The United States Steel stocks pre-sented a firm front, but were less ac-tive. Prices were back near the lowest when the bank statement appeared. The bulls attempted to mark up prices against the bears, but they secured no following, and the bears continued to sell. Prices thereupon broke to the low est of the day. The decline below last night for St. Paul reached 4. Union Pacific 3%. Atchison 3% do preferred 2% Northwest 4. Rock Island 4½, and leading rallroad stocks of the trunk lines and southern groups as well as the specialties from 1 to 2 points. Profit taking by the bears caused fitful rallies. but the closing was active and weak and not much above the lowest.

RATHER ANXIOUS.

Unfavorable Possibilities About the Future the Cause.

SOME ORDERS CANCELLED.

Labor Troubles Will Not Curtail Retail Distribution of Goods, Unless of Long Duration.

New York, July 19 .- R. G. Dun & Co.'s Wekly Review of Trade tomorrow will say: "Anxiety regarding unfavorable possibilities in the future rather than any actual present misfortune, depressed securities and caused cancellation of some orders for merchandise by western dealers. Retail distribution of goods will not be curtailed by the labor controversy unless it is of long duration, as the men have saved money during the recent period of full employment at high wages. Similarly, in some agricultural districts where there is fear that little corn will be harvested preceding bumper crops at good prices, have put farmers in such prosperous condition that their purchases will not fall off materially, while the greatest crop of wheat on record has not brought a return to the low prices of

previous heavy yields. "Beyond advancing price of steel sheets and depressing the market for tin, quotations have not been affected by the strike of the Amalgamated association. Pig iron furnaces are not dis-turbed, although record-breaking production will bring accumulation of stocks if the rolling mills are kept idle for any length of time. In the branches not directly concerned there is no change of conditions, orders frequently running months ahead. An early settlement is confidently expected, and there is much relief over the general collapse of the machinists' strike. In anthracite coal regions, work has also been interrupted, but the recently exceptionally heavy output assures abundant stocks for some time.

"Woolen mills are generally more active than at any time this year, or-ders for heavy weight goods arriving in large numbers. The light weight season will soon open, and although it s expected that concessions of from a to 10 per cent from last year's prices will be made, there is prospect of profit in operations unless the raw material should advance. Some uncertainty is seen in the wood market, sellers making futile efforts to secure better terms and uitimately accepting bids at former figures. The tone is distinctly firmer and stocks at mills and in warehouses

"In cotton goods the situation is un-changed. Stability of prices seems as-sured in the footwear industry. The firm tone is sustained by the steadiress of leather, and buyers are not seeking concessions. Factories are runng full time, with orders on ha months ahead. Fall orders arrive free-, and many New England producers refuse new contracts unless allowed to make deliveries at their own conveni-Limited supplies of leather make the market very firm. Hides active and

steady. "Caimer counsel prevailed in the grain markets; exaggerated dispatches were discounted and variations in quotations were less extensive. After a severe break from the best price last Friday wheat steadily advanced, as the feeling became general that foreign re-quirements would bring a new record for exports, possibly exceeding 250,000,-000 bushels. Some of the heavy crop may also be used for fodder in sections where corn is destroyed. These influences fully offset the effect of interior receipts for the week of 6,750,242 bu-suels against only 4,332,253 bushels last year. Atlantic exports show a large gain over last year's figures for the week amounting to 3,902,775 bushels, against 1.841,861 a year ago.

Failures for the week numbered 193 in the United States, against 231 last year, and 32 in Canada, abainst 27 last
